**Please read through all instructions before starting.**

All seams are stitched at ¼" unless otherwise stated.

**Supplies:**

HeatnBond Fleece Fusible High Loft

**Fabric:**

1 fat quarter cotton

**Other Supplies:**

24" of ½" Ric Rac, Aurifil Thread 50 wt. #2692  
Inkjet printer, Iron, Sewing machine, Sharp scissors,  
Chopstick, and other basic sewing supplies

**Instructions:**

**Step 1: Cutting**

Cut 2 of the pattern from the fabric and cut 2 from the HeatNBond Fusible Fleece.  
The fusible fleece pieces are shorter and need to be cut according to the lines on the pattern.

**Step 2: Bond the HeatNBond Fleece**

Bond the two HeatnBond Fleece Fusible High Loft to the wrong sides of the fabric pieces following the manufacturer's instructions. Set one aside fleece backed piece aside for the back.

### Step 3: Ric Rac

Stitch the Ric Rac to the top and bottom of one of the fleece-backed fabric pieces. Place the Ric Rac on the edge of the fabric on the right side and stitch 1/8" from the edge.

### Step 4: Finish

Pin the two pieces right sides together and stitch 1/4" seams at the top and bottom.

Clip the seams up to the stitching with scissors and turn right side out.  
Use a chopstick to push the sides out and press.  
Top stitch close to the edge around all 4 sides of the sleeve including the raw edge ends.

Next, pin the ends together wrong sides together and stitch  $\frac{1}{4}$ " from raw edges.  
Trim the seam allowances to  $\frac{1}{8}$ ".

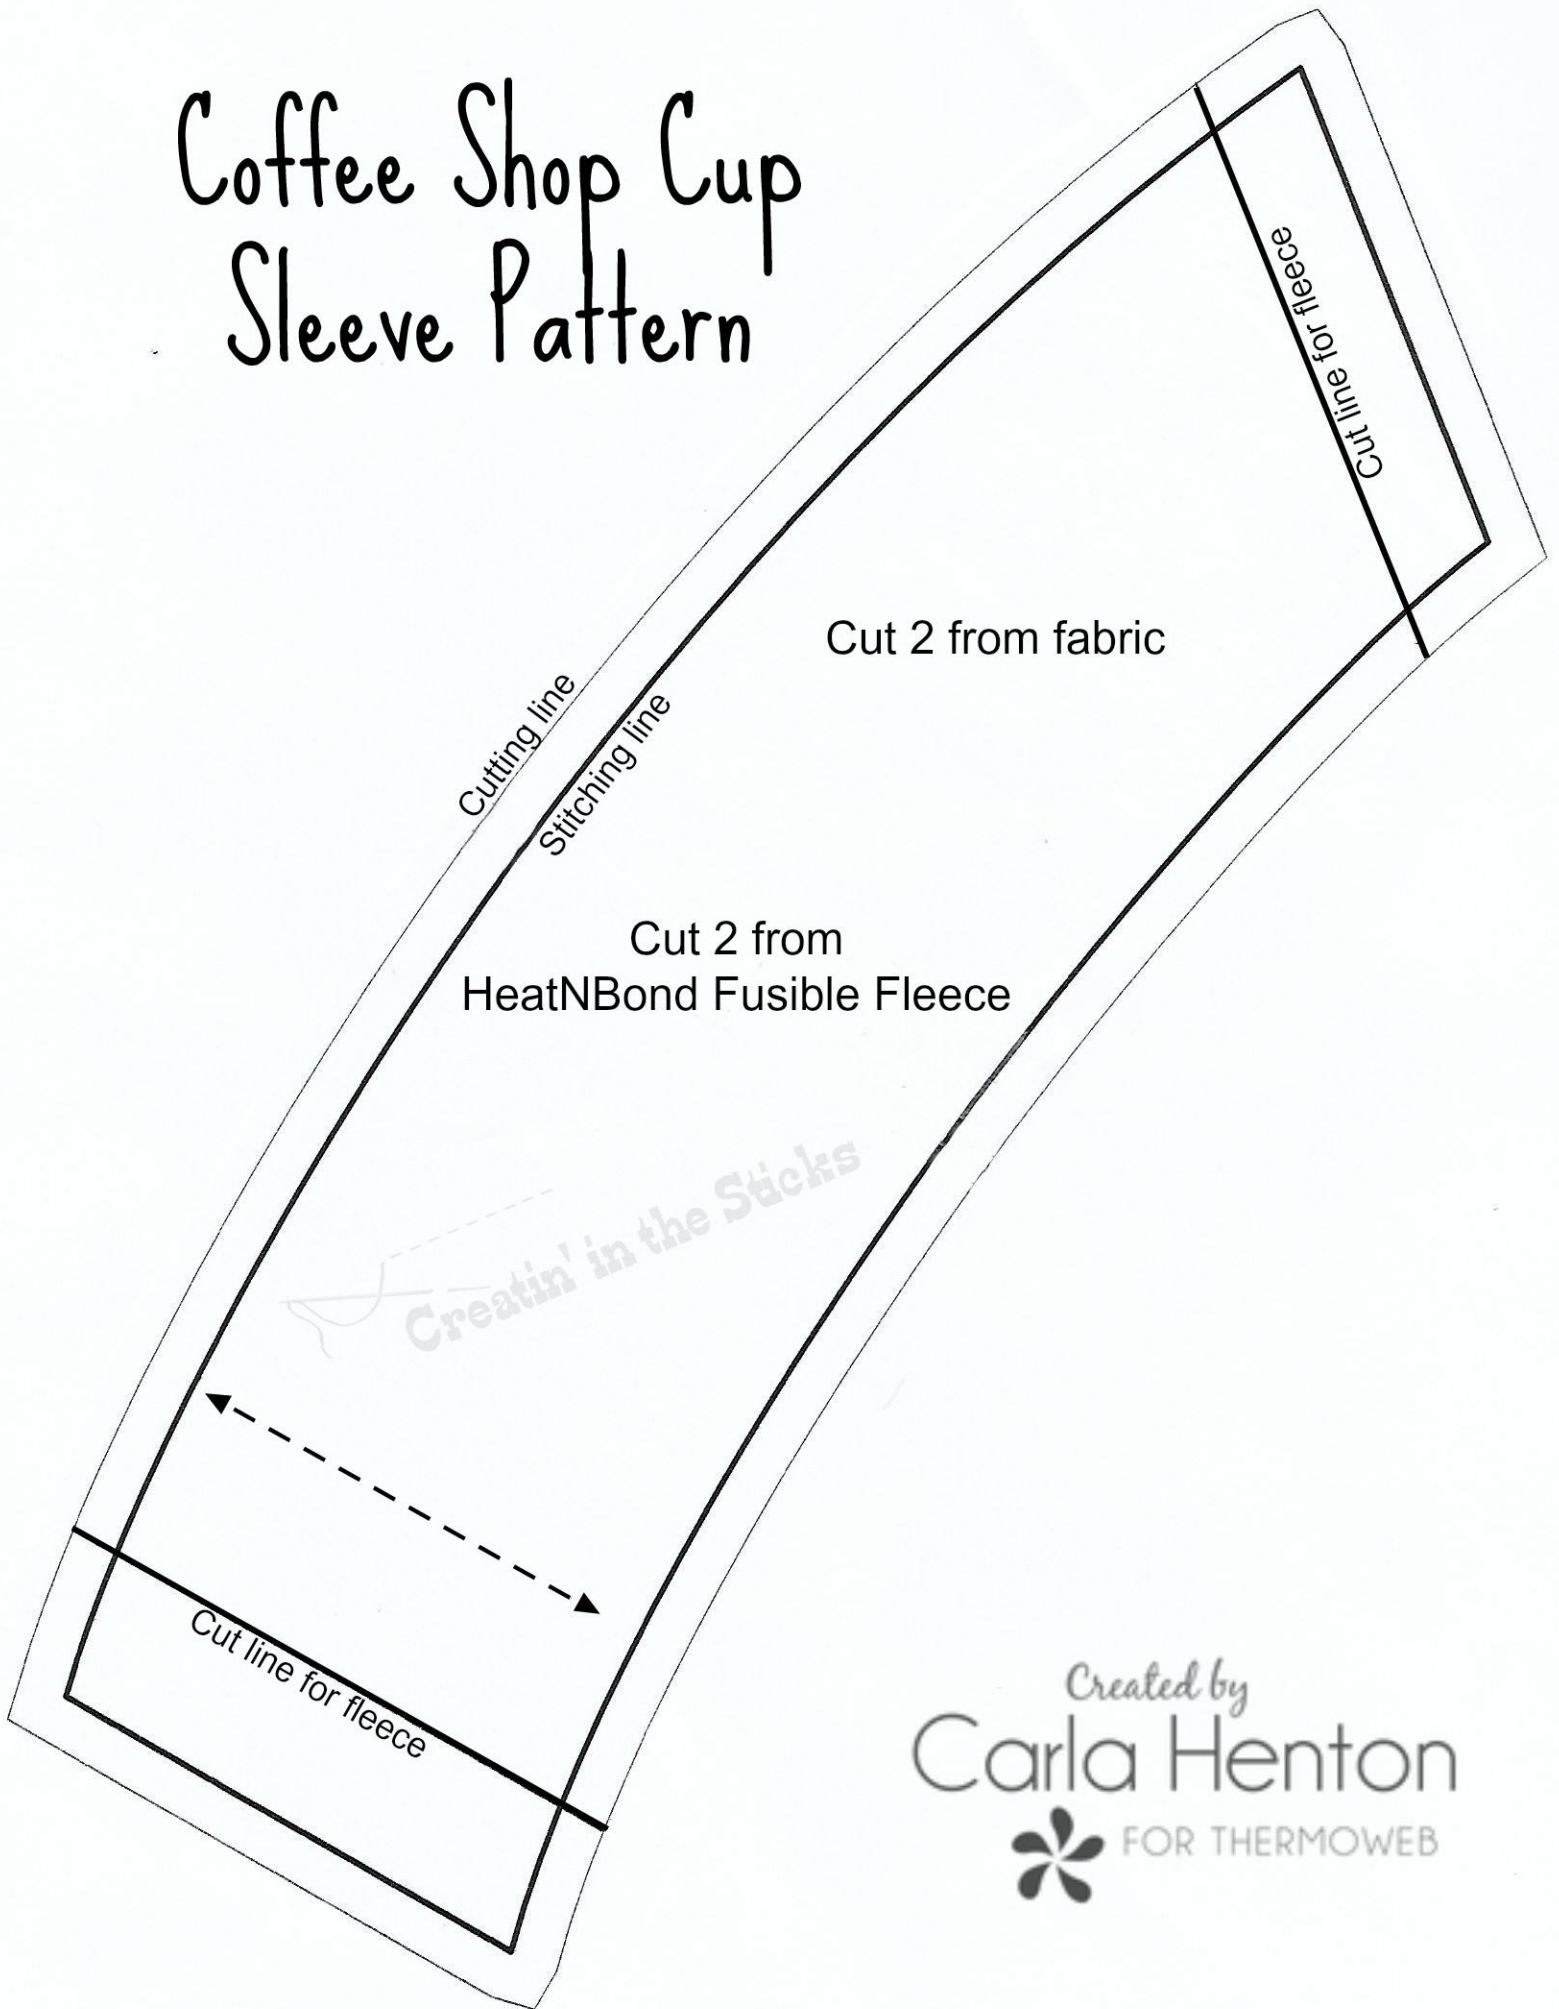

After the seam allowances are trimmed, turn the sleeve wrong side out and pin the seam tucking the raw edges in the seam and matching Ric Rac edges and topstitching.

Make a French seam by stitching  $\frac{1}{4}$ " from the edge.  
Turn right side out and slip it on any paper coffee cup.
